Invitation letter for baseline data collection on EIF implementation

Dear colleagues,

On 23 March 2017, the European Commission adopted a new [Communication on interoperability](#), which introduced a revised [European Interoperability Framework \(EIF\)](#). To this end, the ISA² programme is a vital instrument for the implementation of the revised EIF and its monitoring, as specified in Art. 1 of the [ISA² Decision](#). On the other hand, all the European Union Member States signed the eGovernment Declaration in Tallin on 6 October 2017 with a clear **commitment to implement the European Interoperability Framework**.

Therefore, DIGIT is launching a monitoring mechanism to collect evidences on the EIF Implementation.

This survey aims to gather sufficient information from Member States to produce a **first draft database** needed to create a tailored set of **composite indicators**. These composite indicators will subsequently be used to annually monitor the level of implementation of the EIF, starting in autumn 2019.

Considering your expertise in this field of work, we kindly request every Member State to complete the on-line survey by Wednesday 30 January 2019.

Yours faithfully,

Natalia Aristimuño Perez
Head of Unit
